Money Maths:
Pocket Money Sums

Let's look at buying things

Henry gets £3 pocket money a week. He wants to buy a skateboard which costs £4.80.

How much of the £3 does he need to save each week, if he wants to buy it in 4 weeks?

£

After 4 weeks, how much does Henry have left over after he has bought the skateboard?

£

Camilla receives 70p each week. She has been saving for 6 weeks. **How much has she saved?**

£

After saving for 6 weeks, Camilla decides to buy a teddy for her younger sister which costs her £1.50. **How much does she have left over?**

£

If Henry and Camilla decided to save their pocket money together, **how much could they save in a week?**

£

How much could Henry and Camilla save in 10 weeks if they decide to save their pocket money together?
